[g a l e r í a]

August 20, 2024; Aguascalientes, Mx

To Whom It May Concern:

La Morgue [galería] is an anarchist and contemporary art space in Aguascalientes, Mexico.

We are pleased to announce ourselves as an independent and autonomous project.

Currently, we are working on several research and production projects (with 15 active artists participating), and one of them is our second tele-residency program: "Programa Internacional de Tele-Residencias Artístico-Imaginativas 2024."

This program is led by me, Isra (Israel Martínez), with the aim of fostering dialogue and collaboration between the artists at La Morgue [galería] and those in Japan over November to December, as well as with Korean from August to September this year.

The purpose of this letter is to initiate a dialogue with your space to arrange a virtual visit, a brief interview, or even an action that connects our space with yours.

I hope this letter finds you well, and that we can explore the possibility of collaborating.
